

# Jo Boaler & Cathy Williams

## Virtual Conference

May 7, 2021

10:00 am—3:30 pm

21st Century Teaching and Learning

What & How Should We Be Teaching and Learning?

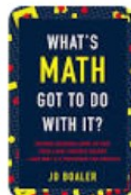

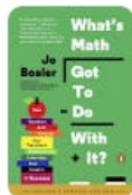

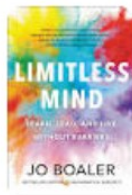

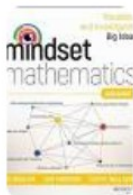

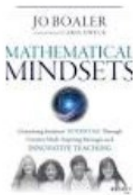

Link To Join Conference Will Be Shared With All Participants Before the Conference

### About This Program:

Recent years have seen an explosion of scientific evidence showing that there is a different way to learn, lead, and live available to us all. When people take a limitless approach to learning—in mathematics and in life—different pathways open up, leading to higher, more equitable and more enjoyable achievement. In this session, we will consider what this different approach is, thinking about the ways we can teach students to increase equity, engagement, and achievement. In this workshop, you will consider the nature of the content you are teaching. Our world is filled with data and data visualizations and a new, important goal for teaching is to help students become data literate, learning to make sense of data in their lives and separate fact from fiction.

### Who Should Attend:

Teachers, administrators, coaches, counselors—anyone wanting to learn how to teach with a 21st century perspective!

Books by Dr. Jo Boaler

### About our presenters:

**Dr. Jo Boaler** is the Nominelli & Olivier Professor of Education at Stanford University. She is a guru on how to teach mathematics for a growth mindset and is the Co-Founder of *youcubed*. Former roles have included being the Marie Curie Professor of Mathematics Education in England, and a math teacher in London Comprehensive Schools. Her PhD won the national award for educational research in the UK. She is an elected fellow of the Royal Society of Arts and a former president of the International Organization for Women and Mathematics Education. She is the author of fourteen books, numerous research articles and several online courses. Her latest book is *Limitless Mind: Learn, Lead & Live without Barriers*.

**Cathy Williams** is the Co-Founder and the Executive Director of *youcubed*. Previously, Cathy served as the Director of K-12 Mathematics in the Vista Unified School District where her professional development series earned a California State Golden Bell Award. Cathy's former roles have included a high school mathematics teacher, AVID coordinator, and mathematics department chair and district curriculum leader. Her key projects included developing the book and professional development program, *Math Language that Works* and the online math teacher support program, *Getting Ready for Algebra*.
