Please register with Dynavox also

<http://www.dynavoxtech.com/training/on-location/details/?id=2836>

This training will encompass all of the basics of using the Series 5 devices (Maestro, V and Vmax) as well as specifics related to setting up the device for use in the school setting. Topic areas will include button modification, making a page, linking a page, and specific user settings. There will be time allowed for user-specific questions as well. The morning session will be dedicated to generalized basic operations such as programming -creating custom messages and pages, navigating, etc. The afternoon is dedicated as a “hands-on” lab. Dynavox trainers will assist you in customizing your device and pages for specific students.

Please bring a Dynavox Series V device to the training. Contact Judi Cumley (cumleyj@cesa5.org or 608-742-8814 ext. 311) if you are unable to bring a device.
