Agenda

*** Pre-Inservice Opportunity ***

8:30am – 9:00am If you have questions about our science equivalency process, how to get started, possible hurdles, paperwork I will be available to help and have materials for distribution.

8:45am – Registration

9:00am – Welcome & Introductions

Session #1 – We will talk about the current work happening with common core standards, and our TEE standards. Our discussions will center on how to make you programs and curriculum better. Carl Perkins programs of study, gender equity, SkillsUSA, and data will also be interwoven into this discussion.

11:30am – Lunch

Session #2 – One of the most distinguishing features of the Common Core State Standards is the emphasis directed to literacy in all of the disciplines. For students to be college and career ready, they must be

proficient in reading and writing complex informational and technical text. This means that instruction in every classroom focuses on both the content and the reading and writing skills that students need to demonstrate learning in the discipline.

Session #3 – Work-based learning requires the blend of academic content and technical skill development. These programs are one aspect of CTE that make us unique. In this session we will discuss our state certified construction coop programs, youth apprenticeship and apprenticeship programs. For some of our in-service dates we hope to have apprenticeship guest speakers.

3:30pm – Adjourn
