

Counting Collection and Choral Counting Series

Join us to discuss the importance of counting (collections and choral) through grade 5 and how to create collections and counts that will challenge the upper grades.

Participants in this series will be learning:

- to build students' number sense and instill a deeper understanding of numbers
- to create counting collections
- to fit counting collections and choral counting into their math program
- to use the data gathered from collection and counting work to drive instruction and interventions
- to create/design recording sheets to meet the goals of lessons being taught
- how students examine number relationships that enable them to identify, discuss, and use patterns to further their understanding of mathematics

Registration:

\$280 for CESA 5 School Improvement
Services Members
\$425 for Non-Members
