

Math Running Records for Assessing and Building Basic Fact Fluency

CESA 8 Aspen Room

(This event will be held virtually if COVID conditions do not allow for an in-person event.)

August 10, 2021 and August 11, 2021
9 a.m. - 3 p.m. daily

During this two-day workshop, participants will learn how to use Math Running Records to assess students' basic fact fluency and determine the next steps for increasing student achievement in comprehensive fluency. Dr. Nicki Newton's best-selling book *Math Running Records in Action: A Framework for Assessing Basic Fact Fluency in Grades K - 5* will be referenced throughout the two days.

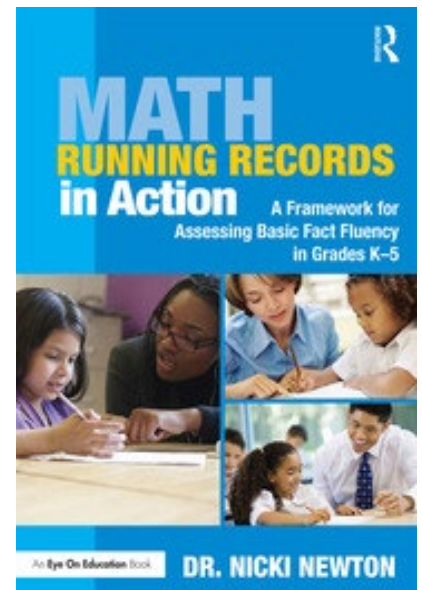

August 10th: Addition and Subtraction Running Records

August 11th: Multiplication and Division Running Records

Topics include:

- Administering, analyzing, and interpreting Math Running Records.
- Developing instructional strategies to help build fact fluency.
- Games to support fact fluency development.
- Collaborating with others to develop an implementation plan at the district level.

Audience: Grades K - 5 math educators, including math interventionists, special education teachers, and paraprofessionals who support students in math

Participants are encouraged to purchase the book *Math Running Records in Action: A Framework for Assessing Basic Fact Fluency in Grades K - 5* prior to the day of the workshop. The option to purchase the book will be available upon registration for an additional \$30.00.

Cost: \$200 (\$230 with book option) per person for CIA member school districts.
\$400 (\$430 with book option) for non-CIA member districts.
