Ensuring Data Privacy and Student Safety
Online Micro-Course

June 22, 2021 – 10 a.m. - 11:30 a.m.*
August 13, 2021 –9:30 a.m. - 10:30 a.m.*
August 27, 2021 – 9:30 a.m. - 10:30 a.m.*

Data privacy and online student safety may sound daunting and technical. Educators can do simple, important things to protect student data and create safe places for online learning. Students are safer when all educators take responsibility instead of waiting for the school district to provide all the protection. During this micro-course, educators will learn how to:

- Evaluate and reconfigure or eliminate any app, website, product, or service that does not protect student data.
- Teach students digital safety skills to protect themselves in online environments.
- Teach students what to do when they encounter inappropriate content online.

Schedule:
June 22, 2021 – Enrollment & Kickoff
August 13, 2021 – Course Check-In
August 27, 2021 – Course Completion & Celebration

*Micro-course requirements include three synchronous, whole-group virtual sessions on the dates and times listed as well as independent work between sessions. The estimated time commitment is 15 hours. This asynchronous course can be completed at any time prior to or after August 27, 2021.

Intended Audience:
K-12 Educators, Technology Coordinators, Technology Integration Coaches, Library Media Specialists, Curriculum and Instruction Specialists, Administrators, Face-to-Face Educators, Hybrid Educators, Blended Learning Educators, Virtual Educators
