

# Introduction to Moodle

This workshop provides educators with the skills and knowledge they will need to be an effective online instructor in order to meet the needs of 21st century students. Using Moodle, course participants will become part of a community of learners as they build a solid foundation for their own online course. They will learn how to ensure that their learning outcomes are met through educationally sound activities that are measured through technology based assessments while providing opportunities for active learning.

## Goals/Objectives

1. Learn the basics functionality of Moodle and how to utilize its features.
2. Review varied Moodle Courses
3. Begin to develop a course on Moodle that will integrate various technologies and file types into interactive lessons that will enhance student learning and achievement.
