

# Trauma-Sensitive Schools - CESA #12 Cohort

2021-2022

CESA 12, in coordination with the Wisconsin Safe and Healthy School (WISH) Center and DPI, developed a sustainable support system to increase access to schools wanting to engage in the journey towards learning and capacity building around trauma-informed philosophy and practices. Engagement in this type of development helps to promote the success of all our students within a comprehensive school mental health system. This initiative is rooted in the following vision: All students, staff, and families experience a school community that is engaged in trauma sensitive processes and practices in order to intentionally build resilience and provide opportunities for healing.

When	What	Who	Where
