2021-22 EARLY CHILDHOOD NETWORK

The Early Childhood Network series is ideal for any person working with young children in school- or community-based settings. Each session in the series offers the opportunity for early childhood education professionals to come together and to gather research-based and developmentally appropriate ideas and philosophies intended to help you grow as a professional.

In addition to timely networking topics, the series will also dig deep into the resource: *Serious Fun: How Guided Play Extends Children's Learning*.

Series objectives are:

Guided Play - How to balance child-guided and adult-guided play

Environment Set Up - How to set up play environments with learning goals in mind
Extending Learning - Suggestions for how to prompt children's reflection and learning

Advocacy & Family Engagement: Responding to families, colleagues, directors/principals, funders about how children learn through play; preparing your elevator speech

Team Work! Teaching Little Kids Is a BIG job! Collaboration with paraprofessionals, teachers, volunteers, support staff, etc.
