# WHAT IS SCRIPT AND WHY DO WE NEED COMPUTER SCIENCE FOR ALL STUDENTS?

CESA 4, in partnership with CSforALL and DPI, is pleased to invite CESA 4 schools to offer FREE SCRIPT (Strategic CSforALL Resource & Implementation Planning Tool) training. CSforALL provides "computer science for all," with a mission to create high-quality, equitable, and accessible computer science programs as an integral part of our K-12 education in the United States.

This FREE SCRIPT Training Workshop will guide district teams to create a customized implementation plan in order to meet the goals and needs of a rigorous, inclusive, and sustainable computer science infrastructure. This will include goal-setting across five specific areas: (1) Materials and Curriculum, (2) Leadership, (3) Teacher Capacity and Development, (4) Partners, and (5) Community.

Space is limited for 2-4 school district teams for our Spring 2022 (March 30 & 31) CSforALL Cohort. Save your space now and register your entire team.

Spring Cohort Registration
