Effective iPad and Mac Uses for K-12

Tuesday, February 1, 2022
or
Wednesday, February 23, 2022

9:00am - 2:00 pm at CESA 5 - 626 E. Slifer St. Portage, WI 53901

Click on session date to register

or visit: cesa5.org/events

Registration Fee: \$25 per person, per session

Participants will be guided through effective technology integration strategies leveraging iPad into lessons and activities. iPad offers multiple options for learners to leverage multiple modes of understanding and showcasing knowledge. Educators will be able to tailor lessons to match specific needs of each student.

These workshops are being facilitated by an Apple Professional Learning Specialist. All Apple Professional Learning Specialists are current or former educators with teaching experience, expert understanding of Apple technology and content resources, and outstanding facilitation skills. Many have received teaching recognition awards and hold advanced degrees. Most importantly, all know what it takes to successfully support effective teaching with technology and nurture behaviors that lead to continuous learning.
