Strategic CSforALL Resource and Implementation Planning Tool (SCRIPT)

What does it take to build a local computer science education plan for your school district? Come to a SCRIPT workshop and find out!

What is SCRIPT?

The Strategic CSforALL Resource and Implementation Planning Tool ("**SCRIPT**") is a framework used to guide the creation of customized implementation plans to meet the goals and needs of school districts that are seeking to create computer science education ("**CSed**") plans, guided by CSforALL values of rigor, inclusion, and sustainability.

The SCRIPT engages school districts in goal-setting across five thematic areas: (1) Materials and Curriculum, (2) Leadership, (3) Teacher Capacity and Development, (4) Partners, and (5) Community. A sixth thematic area, Technology Infrastructure, is in development.

What is a SCRIPT Workshop?

Sustainable CSed plans for ALL require a long-term commitment and an informed, strategic approach from the local education system — school districts, local education agencies, and regional service centers — as well as the support of the local community. This shifts the ownership of the success of the CS education initiative from individual stakeholders to the systems level.

During the SCRIPT Workshop, District Teams formed by multiple agents of change in the education system collaborate on self-assessment and goal-setting, to evaluate what needs, strengths and challenges their district faces to develop a long-term CSed plan. District teams will also set 3-month, 6-month and 12-month/long term goals. SCRIPT workshops are led by the CSforALL team or by a SCRIPT Facilitator trained by CSforALL.

SCRIPT

What are the requirements for districts who want to participate in a SCRIPT Workshop?

Districts who want to participate in a SCRIPT Workshop need to commit to three things:

1. The District Teams must join CSforALL's Membership Community prior to participating in a SCRIPT Workshop.

2. The District Teams must be composed of at least **ONE OF EACH** of the following for the entirety of the SCRIPT work:

   a. A district administrator/tribal department of education,

   b. A school leader,

   c. An educator that will teach or currently teaches CS,

   d. Another school-based member that can either be instructional or non-instructional (librarian, school counselor, etc.);

   Note: the District Teams should include one representative for K-8 and one for 9-12.

3. The completion of ALL data collection instruments including a data sharing consent form, a series of self-assessment rubrics, a goals submission form, a post-workshop survey, as well as 3-, 6-, and 12-month follow-up surveys

4. Consent to share their answers to these data collection instruments with CSforALL for organizational learning purposes, and optional consent for research purposes.

What is CSforALL?

Computer Science for All is the national hub of the computer science for all movement with a mission to make high-quality computer science an integral part of K-12 education in the United States. Our three pillar approach; Support Local Change, Increase Rigor and Equity, and Grow the Movement, directs our work across a national and local spectrum to provide equitable and accessible K-12 computer science education to every student. We engage with diverse stakeholders leading computer science initiatives across the nation to support and facilitate implementation of rigorous, inclusive and sustainable computer science.
