Using Technology to support the UDL Framework

Creating a universally designed classroom is a constant process and a lot has changed in the past few years as we rely more on Chromebooks and other technology. With this transition, we need to consider how learning is still accessible and engaging to all students and also how technology can be used by students to express and demonstrate their learning. In this one-day workshop, we'll review the framework of UDL and analyze ed-tech tools that account for student variability, provide flexible pathways to obtain firm goals, and empower students to be in the driver's seat of their own learning.

Wednesday, February 8, 2023

9:00 am - 2:00pm
CESA 5, Portage, WI

REGISTRATION FEE:

$100 for CESA 5 ITSS or SIS Members

$200 for Non-Members
