

CESA #3 Presents:

Deeper Understanding Workshop for Middle and High School Math Standards

The Deeper Understanding Workshop was created for those teachers of mathematics who would like a “deeper look” at the Common Core State Standards (CCSS). This session will give participants a mathematical experience that makes connections over multiple grades and conceptual categories through the use of mathematical processes and practices. Emphasis will be placed on investigating and understanding the standards by grade level using a modeled process that can be duplicated at the local level with teacher teams.

Intended Audience:	Middle & High School Math Teams and Instructional Leaders
Date:	Monday, March 19, 2012
Time:	8:30-3:00
Location:	CESA #3 Conference Room C & D
Presenter:	Dr. Jodean Grunow and CIA Team
Cost:	\$45 per person or \$150 team (CAT Members) or \$200 per person or \$500 team (Non-CAT Members)

Workshop participants will . . .

- Examine the underpinnings, connections, and organizational aspects of the CCSS.
- Unpack the mathematics standards and investigate the knowledge, skills, and understandings inherent in the standards.
- Investigate the horizontal and vertical connections and progressions within the CCSS.
- Learn strategies to align existing units and courses to the CCSS.
- Explore differentiation strategies to meet individual student needs.
- Discuss and plan how to modify existing lessons, units, or courses.
- Develop an action plan with a calendar of next steps.
