

Administrators and the Common Core

**January 4, 2012
9:00 AM—3:00 PM**

**CESA 8 Office
223 W Park St
Gillett, WI 54124**

The Common Core state Standards have many implications for administrators. As district and building instructional leaders, you will be charged with insuring that the CCSS is implemented in every classroom across every school district. This shift in teaching will lead to shifts in teacher evaluation, data analysis, and professional development.

During this one day workshop, we will learn about CCSS, the Smarter Balanced Assessment (which will replace the WKCE in 2015), curriculum, and implementation of new curriculum. We will unpack standards using the CESA 7 Standards Insight tool and discuss current curriculum. Providing training to mentor administrators to mentor teachers is critical to the roll out of the Common Core State Standards.

About StandardsInsight™

StandardsInsight™ allows users to **filter** the standards by grade level, by strand and CCR anchor standards for English Language Arts and by domain or conceptual category for Mathematics, and by key word. Filtering allows teacher teams to look at vertical connections among certain strands of standards and search for specific content relevant to their alignment work and deep study of the standards.

The web-based system then provides a robust database, with numerous unpacked fields including:

- Evidence of student attainment
- Key vocabulary for teachers
- Knowledge expected to attain the standard
- Skills expected to attain the standard
- Understandings expected to attain the standard
