

April 14

Field Day for Educators

Tours & Behind the Scenes Access

Spend the day exploring some of the leading businesses in the CESA 10 region and meeting with local employers. Share perspectives and hear from top employers about what makes the local economy tick.

Looking for an answer to "When are we ever going to USE this?" - you'll find the real answers here! Each of these local firms employs people across a variety of career clusters including STEM, Manufacturing, Business Management & Administration, and more.

We will start our day at Ace Ethanol, which was built by local investors and is the first large-scale plant to produce ethanol in the state of Wisconsin.

We will visit J&D Manufacturing, Inc. a manufacturer of equipment for agriculture, horticulture, industrial and commercial applications.

We'll get an inside look at Riverside, the precision manufacturing facility serving medical, aviation, space & defense, and emerging high-tech industries.

Lunch on your own in historic downtown Chippewa Falls.

Sign up today:

Our business partners have limited capacity for visitors, please sign up as soon as possible: <https://login.myquickreg.com/>
