

BRINGING THE 8 EFFECTIVE MATH TEACHING PRACTICES TO LIFE IN YOUR CLASSROOM

OCTOBER 25, 2022

9:00 AM - 2:30 PM

CESA #12 CONFERENCE CENTER

Are you ready to take your mathematical teaching practices to the next level?

This training is for both new and experienced teachers. Together, we will examine the 8 effective math teaching practices and the potential impact each has on student learning. We will focus on the power of multiple representations to develop conceptual understanding that will lay the foundation for procedural skills and fluency. We will uncover strategies to create opportunities for meaningful mathematical discourse and increase student engagement. We will use those student engagement activities to effectively elicit evidence of student thinking to guide instructional decisions.

The goal of this training is to experience first hand teaching strategies and techniques you can immediately put to use in order to bring the 8 effective math teaching practice to life in your classroom!

This training will be interactive so please consider wearing comfortable shoes.

E-MLSS Key Features:
High-Quality Instruction
A Strong Universal Level of Support
Evidence-Based Practices

Cost: \$25.00 per participant (cost recovery for meals) for districts that purchased Curriculum Network and Program Support Program (Drummond, South Shore, Winter) | \$200 per participant for all others
