

Portrait of a Graduate

February 14, 2023
9:00am-3:00pm

As we reimagine what success looks like for our students in today's world it is essential that we are defining how we will ensure that every student is prepared for life after high school. Using a Portrait of a Graduate, you can articulate what student success looks like in your district by providing families and your community with a greater vision of the K12 education students receive. Building from your Portrait of a Graduate, you can work to align your Academic & Career Plan with Rigorous academic content, and track your progress using Redefining Ready indicators among others to ensure you are helping your students achieve success. Join us for a day of learning and work as we start this process with your team!

The cost for this workshop is \$450.00 for #273 ACP contracted districts. All other teams are \$650.00. It is recommended that each team have an administrator on it.

Each team that attends will receive 4 hours of additional coaching.
