

How to Create and Deliver Specially Designed Instruction for the Inclusive Classroom

Presented by Anne M Beninghof, author, presenter and teacher

Inclusion can work! However, for inclusion to be successful, special education teachers must bring specially designed instruction (SDI) into the classroom. In this workshop you will gain practical ideas for creating and implementing SDI, for engaging the most difficult students, and for planning with general educators. This session will be packed with research-based strategies that enhance student learning and can be implemented immediately. Anne will share inclusive lesson plans, show video clips and provide participants with interactive experiences.

Learning Targets

Participants will be able to:

- define and give examples of specially designed instruction
- apply a process for developing and integrating SDI into lessons
- evaluate and choose strategies for adapting content, methodology and delivery of instruction
- create lessons to use with their students

Anne M. Beninghof, an internationally recognized consultant and trainer, has more than forty years of experience working with students and teachers, in a variety of public and private settings. She has been a special education teacher, adjunct faculty member of the University of Hartford and the University of Colorado, has published several books and videos, and provided staff development in all 50 states. Anne has authored 13 books, several educational videotapes and is a regular contributor to blogs and webinars. She has also collaborated with numerous state agencies to bring about inclusive practices. In her teaching, presenting and writing, Anne focuses on creative, practical solutions for more effectively including students with diverse learning needs in general education classrooms.
