

Virtual Reality Educational Pathfinders (VREP) Institute

January 10, 2012

VREP is a student-led, competency-driven, producer-oriented, project-based approach to learning which utilizes cutting edge virtual reality and 3D tools.

Recommended for students in grades 8-11, the VREP Institute:

- Is a multi-state, large-scale, effort by business, industry, government and education to bring VREP's innovative, student-directed learning approach to as many schools as possible.
- It is a comprehensive network of students learning and working together to create educationally-relevant virtual reality experiences for all students through an on-line library will make 3D and VR learning a reality for thousands of students across Wisconsin and beyond.
- Springboards students in their ability to develop and create using virtual reality/3D modeling tools.

Impact on Student Learning:

"Because of this student-led approach, knowledge is no longer confined to the four walls of our school. Students become the teacher, the learning, the developer and, as a result become more responsible for their own learning and education. We have seen high-performing students, disengaged students, and students with learning difficulties all thrive when you them in this setting".

- Rex Kozak, Principal
East Marshall High School
LeGrand, Iowa

Students will need to bring a computer laptop for the training
