

# MENTAL HEALTH IN THE CLASSROOM: EARLY CHILDHOOD & ELEMENTARY

**NOVEMBER 9, 2023 9:00 AM – 3:00 PM**

**Learn about best practices to support student mental health in your own classroom setting. Whether we are correcting a behavior, giving feedback on an assignment, reteaching a math concept, or trying to solve a conflict, we are presented with countless opportunities to shape the social, emotional, and behavioral skills of students every school day. In this session, we will talk more about how to recognize, teach, and reinforce discrete skills, knowledge, and dispositions in these areas to meaningfully contribute to student success in learning, relationships, and self-management. This workshop will provide universal strategies to improve student mental wellness.**

*This workshop is recommended for ALL EC and elementary certified and support staff.*

## **COST**

This workshop is FREE for districts enrolled in the Framework for Success mental health programming. Non-enrolled districts are \$150.00 per individual registered.

Each workshop includes food and drink, copies of training materials, and digital resources.

**Register**
