

# COMPASSION RESILIENCE FOR EDUCATORS – WISH CENTER

**JANUARY 16, 2024 9:00 AM – 3:00 PM**

**In educational environments, we want adults to maintain a compassionate presence as they interact with students who present with unique and complex challenges. However, the additional pressures placed on our educators today often rob them of the resilience they need to face adversity in the school environment, and bounce back with vitality after setbacks. Compassion resilience training supports educators, administrators, and school board members with understanding, recognizing, and preventing/reversing the impacts of compassion fatigue within your school system. The training offers brief, flexible learning activities that can be integrated into staff meetings, trainings, and ongoing communications.**

*This workshop is recommended for Student Services, Teachers, Administrators, School Board Members.*

## **COST**

This workshop is FREE for districts enrolled in the Framework for Success mental health programming. Non-enrolled districts are \$150.00 per individual registered.

Each workshop includes food and drink, copies of training materials, and digital resources.

**Register**
