

ENSURING MENTAL HEALTH EQUITY: CREATING A SAFE SPACE FOR ALL

MAY 2, 2024 9:00 AM – 3:00 PM

Data shows us that certain populations experience mental health distress at a disproportionate rate. This workshop will provide information on the populations of students most at risk for mental health distress. Experts in the field will share strategies to improve the school experience for these groups of students and provide guidance on legal issues in a politically charged educational environment. This workshop will have a system focus and include opportunities to increase your personal data literacy and better understand your district student mental health and behavioral data.

This workshop is recommended for ALL school staff including certified and support staff.

COST

This workshop is FREE for districts enrolled in the Framework for Success mental health programming. Non-enrolled districts are \$150.00 per individual registered.

Each workshop includes food and drink, copies of training materials, and digital resources.
