

2023-24 CESA 8 MATH NETWORK MEETINGS

CESA 8 | 223 WEST PARK STREET | GILLETT, WI

Have you ever felt that there must be a better way than the prescriptive special-ed approach to teach mathematics to students living with disabilities? During our book study, we will consider how the authors of *Humanizing Disability in Mathematics Education: Forging New Paths* not only challenge the prevailing stereotypes of learners with disabilities but also set out a philosophy and methodology to change the underlying attitudes towards disability and those who live with one. As one of the authors states, “By *humanizing* we mean treating disabled students with dignity in their inherent capacities to think and do mathematics.”

Sample Meeting Topics and Activities:

- Book Study: *Humanizing Disability in Mathematics Education: Forging New Paths*
- Special Education
- Universal Design for Learning (UDL)
- Local, state, and national initiatives
- Invited guest speaker(s)
- Resource sharing
- Networking time with CESA 8 educators of mathematics
