K - 12

HANDS ON SCIENCE NETWORK DAY

Are you looking for authentic hands-on learning experiences for your students? Gain confidence teaching energy education indoors and out with lessons and kits from KEEP - Wisconsin's K-12 Energy Education Program!

Join us for a hands-on workshop filled with tools, activities, and ideas for energizing your teaching across the curriculum. Activities are adaptable for K-12 and include:

- Using Energy Audit tools to take temperatures and connect to climate change education
- Discovering Energy in Nature: Energy in an Ecosystem
- Solar Tilt and Solar Load Exploration
- Beings on the Move: Climate Change in Wisconsin

Please dress for the weather! Time will be provided for collaboration, networking, and lesson planning.

Activities will be led by Laureanna Raymond-Duvernell. Laureanna has a BS in Elementary Education from UW-Madison and a MS in Environmental Education from UW-Stevens Point.
