

A School Crisis Doesn't Schedule an Appointment

TIG/CISM: Trauma and Grief in Schools/Critical Incident Stress Management Training

Join a growing number of local teams and districts as they examine, develop, and refine their crisis prevention and response plans. Content covers a wide variety of potential critical incidents schools will face: trauma, death, grief, violence, suicide, illness, and crisis response. Access to a rich resource library will help you navigate threat assessment, re-entry plans, suicide prevention and intervention, talking to students about death, and safety plans among many others.

You will learn and practice crisis response skills: Crisis Management Briefing, Defusing, and Critical Incident Stress Debriefing which can serve as a guiding framework when you are faced with a critical incident in schools. CESA 6 is engaged in developing emerging multi-district networks who can support each other when faced with a critical incident knowing that all responders share common knowledge and response protocols. Certification in delivery of three Group Crisis Response skills is received.

Benefits

In order to accommodate a range of learning needs and preferences, this series is being offered as a hybrid model. CESA 6 conference space and facilitation is available for all virtual learning events to accommodate those who prefer to engage in learning off-campus.
