

# Structured Work Systems Professional Learning Series

## Professional Learning and Coaching Series

Structured work systems (independent work stations) are an effective learning tool supportive for students with autism spectrum disorder (ASD) and other students with similar learning profiles who benefit from high structure and predictability (students experiencing symptoms of trauma or mental health issues). Together we will walk through effective implementation of structured work systems as part of well-organized classrooms with highly structured environments. Series includes onsite coaching for implementation support.

Increase independence

Increase engagement

Increase on-task behaviors and task completion

Decrease challenging behaviors

### Outcomes

- Foundational learning of evidence base, critical elements and implementation planning
- Make and take - leave with something you can use
- Connect with other professionals and learn together
- Coaching for customized implementation support

### Details
