Learn the Cutting-Edge Insights and Practical Applications of AI

The AI Learning Collaborative will meet bi-monthly to discuss current AI advancements, practical applications within educational systems, and potential challenges. Each session will provide comprehensive updates on AI technologies, ensuring district leaders stay informed about the latest trends.

The Collaborative will focus on real-world applications, such as AI-driven tools for administration, personalized learning, and data analysis, bridging the gap between theory and practice. Collaborative problem-solving will allow leaders to address challenges and share strategies. Expert guest speakers will offer valuable insights, enhancing knowledge and resources.

The Collaborative aims to equip district leaders with the skills needed to navigate the evolving AI landscape, improve student learning, and enhance operational efficiency through AI integration.

Benefits

In-person meetings with bi-monthly recorded opportunities.

- **Specific topics throughout the course of the year:**
  - » September (In-Person): Generative AI Readiness
  - » November (Virtual): AI for Personalized Learning
  - » January (In-Person): AI in Educational Assessment
  - » March (Virtual): AI in Curriculum Development
  - » May (In-Person): AI for Professional Development

- **Framework for each meeting:**
  - » Welcome and Introduction
  - » Review of Recent Updates and Tools
  - » Generative AI Topic of Focus
  - » Guest Speakers to discuss implementation of AI within districts
  - » Interactive Discussions
  - » Q&A Wrap-Up

Pricing

- $150 for Individual Sessions
- $600 Per Participant for All Sessions
