

Embrace Relationships, Resolve Conflict, Repair Harm and Focus on Learning in Your School

FEBRUARY 5th - 6th, 2025 | 9AM-3PM

Restorative Practices focuses on building a community, growing positive relationships, resolving conflict, repairing harm and healing relationships. Restorative Practices offer an alternative to traditional punitive disciplinary actions that often lead to disproportionately punishing students from marginalized groups. Educators, leaders, and school teams are encouraged to take part in this interactive dynamic training.

Objectives

- Understand the foundation and key aspects of how to apply the Restorative Practices continuum
- Learn how to use Affective Statements as a communication and relationship building strategy
- Learn how to use Restorative Questions as a tool to help youth restore relationships when harm has occurred by a youth's behavior or actions
- Understand, learn, and practice how to incorporate Community Circles into your classrooms and school programs
- Plan for implementation of Restorative Practices within your school district educational setting
