

Embrace Relationships, Resolve Conflict, Repair Harm and Focus on Learning in Your School

Are you ready for your administrators and leadership teams to learn the key elements of Restorative Practices and create a specific implementation plan that meets your school community, ultimately leading to a school district that uses the practices with fidelity. Professional development will include theory and steps for implementation. Your staff will continue to receive a variety of coaching options which may include but not limited to: office procedures and data collection, review and update of behavior management guidelines, communication tools for families and the community, problem solving of specific cases and in school modeling of circles and conferences.

Benefits

- Catered professional development plan that meets your district's needs which may include professional development and/or coaching
- On-going coaching to build systems of success for students, teachers and administrators
- Development of resources to guide implementation and communication to stakeholders
- Targeted collaboration with participating districts throughout the state

Goals

- Develop a school community based on relationships
- Enhance educators' skills to solve problems and repair harm with students
- Decrease disproportionately of marginalized students
- Increase accountability and in classroom learning time

“

I can say that through our CESA 6 training with Katie and our coaching conversations I have continued to grow and transform in my work around Restorative Practices. The personalized coaching sessions have provided me with valuable insights and guidance. The ongoing support and willingness to always make time for me has provided me with a sense of great customer service. Whether it is a quick 5 minute conversation, email, chat, providing feedback on professional development sessions I lead, etc it has been nothing short of remarkable.
