**Registration Cost: \$750.00 for a team of up to 5 people or less
(\$150 for each additional participant) ~ Materials are included ~**

Designed by national content experts and Wisconsin educators, the Curriculum Companion provides a scope and sequence framework to teach the Common Core Standards for Mathematics. This 4 day workshop is intended to provide an overview of the Curriculum Companion and an investigation of the Inquiry Modules for each grade-level for content leaders and classroom teachers. District participants will work in grade-level teams to develop lessons, plan content, identify performance tasks, and align resources.

Workshop Goals:

- Examine the design and structural elements of the Curriculum Companion.
- Learn how to navigate through the Companion features.
- Investigate the Inquiry Modules that have been designed for Mathematics at your grade-level.
- Unpack the Mathematic standards and investigate the knowledge, skills, dispositions, and understandings inherent in the standards.
- Explore math content, concepts, and practices for your grade-level or grade band.
- Investigate the gradual release instructional model, various constructivist pedagogies, and problem-based assessment strategies.
- Create a professional dialogue and professional learning community for implementing the CCSS through the Curriculum Companion.
- Develop lesson plans to implement the Curriculum Companion.
