Teaching with an iPad??
iPads in Education

AUGUST 10, 2012 | 9AM-2:30PM | AT CESA 5

The iTouch & iPad are changing the way teachers and students access the web, share media, and learn on the go. These versatile learning and teaching tools can become a calculator, a drawing pad, an interactive map or a multi-language dictionary, all with a swipe of a finger. With access to thousands of apps for content areas, networking and collaboration, and creating, your students will be learning 21st century skills in an engaging format.

This course will start with an overview of the NETS Standards, 21st century skills, and mobile learning in the classroom, covering the basics of the iTouch/iPad, the iTunes software and store, how to find the best educational apps available, explore uses for the classroom, how to create and add content to the iTouch/iPad, and how to use the iTouch/iPad as an assessment tool. Hands-on opportunities to explore new apps and create content for the device will be plentiful.

In this course you will:
• Learn the basic functions of the iTouch/iPad.
• Discuss management of devices and purchasing of apps from iTunes Store.
• Explore and use various educational apps for the iTouch/iPad.
• Develop strategies to search and evaluate effectiveness of educational apps.
• Create digital content to be placed on device.
• Explore apps that can be used to evaluate instruction.
• Actively participate in all class discussions.

Participants should bring an iPad or iPod Touch and a laptop with iTunes software installed. Having an iTunes account will be helpful.

REGISTER ONLINE TODAY
Registration closes at 11:59pm on Friday, **Aug 3, 2012** or when sells out. Space is limited to 20 participants.
