Description

This workshop will investigate the use of mobile computing devices within the special education classroom. Apple's iPod Touch and iPad are opening new opportunities for access to personal apps (applications) for communication, access to news, e-texts, and support of the curriculum! The Pulse SmartPen from Livescribe offers a tool for capture of lectures, directions, way for collaboration through the web based tool and an alternative note taking solution for students with limited mobility! This workshop will provide an opportunity for exploration of educational and communication applications for the iPod Touch, iPad and SmartPen!
