Cyber Safety Curriculum and Ideas for Students with Disabilities

Teaching cyber safety and responsibility is essential for all students but especially for those who have disabilities. Come gain access to free lesson plans and cyber safety curriculums along with a number of resources geared toward students in Grades 2-12. Teach your students, at their own pace, what they need to know to protect themselves and the responsibility that comes along with cyber use.

Address 21st Century Skills for your students in this hands-on workshop. You will be ready to implement lessons and increase student outcomes when you step back into the classroom!

Cost: $150
$100 for Flagship Schools

October 16, 2012

Registration will start at 8:30

Workshop will be from 9:00-3:00
