

Understanding the Common Core Mathematical Practices

Tuesday November 6, 2012

9:00—3:00

Registration and Breakfast at 8:30

**\$150 per person
lunch and materials provided**

Dig deeper into the intent of the Common Core State Standards - Mathematical Practices. Understand how to plan for the practices within your lesson, how to assess students on the practices, and what each practice looks like within the classroom at all grade levels. This workshop will allow participants the chance to collaborate on ways to assess the math practices on a report card, and create rubrics for student evaluation.
