

# A New "PODDsibility" for Communication

## Customizing and Implementing PODD (Pragmatic Organization Dynamic Display) Communication Books

February 24, 2010  
8:30-3:30  
CESA 5

Judi Cumley, CESA 5  
Assistive Technology Consultant

Students who use alternative means for communication frequently don't have the means to truly communicate what they are thinking.

They may not have all of the vocabulary they need and they are limited by what others have programmed into their system. PODD (Pragmatic Organization Dynamic Display) Communication Books may be low tech, but they have the capability to support AAC users who are fully competent communicators.

Come learn about the "PODDsibilities" of this system. Participants will leave with "starter" PODD systems to use with students.
