Description:

Participants in this hands-on course will examine the new learning environment for teachers and students made possible through the effective use of interactive whiteboards (SMARTBoards). They will learn how to: 1) use the basic tools of the Notebook software to operate the SMARTBoard; 2) use Notebook software to create a SMARTBoard presentation that is enriched with graphic detail; 3) work with applications such as Word, PowerPoint, and web browsers on the SMARTBoard; and 4) locate SMARTBoard resources and lesson plans online.

Participants will discuss best practice examples and methodologies for assessing the impact of these tools on instruction. They will identify and discuss ways that SMARTBoards can be effectively used in their classrooms. Participants will use their new knowledge to develop a unit or project incorporating SMARTBoard use into their classroom curriculum or for professional development activities. Unit/project plans will be due one week following the last class session.

Materials and breaks provided. Lunch is "on your own".

Registration Deadlines: One week before each class start date.

Registrations for this class will be taken via the online CESA workshop portal at <http://www.myquickreg.com/>

First time users are asked to fill out an online registration form so that they can register for this and other CESA 5 workshops. Please note that only educators from the school districts listed below are initially eligible to register for these SMARTBoard classes. Other educators can register on a space-available basis one month before the start of each class.
