

# SMART Inclusion

What happens when you combine interactive whiteboard technology with “special needs” software/hardware using Education's best practice (Universal Design for Learning, Differentiated Instruction, Professional Learning Communities) and Speech Language Pathology (Participation Model, Aided Language Stimulation and Differentiated Communication)? **You get SMART Inclusion!**

21<sup>st</sup> century inclusive classrooms and school communities are combining technology with good instruction to enhance educational and social participation for *ALL* students, including those with cognitive, visual and physical disabilities-- “*necessary for some, good for all.*”

Alex Dunn from Upper Canada District School Board, Ontario, Canada, will share the impressive results from their data-driven model-tracking student participation and achievement, as well as teacher learning. Through **case study, video and demonstration**, we will explore how Assistive Technology and SMART Board Tools can be integrated in general education to support teaching and learning for students with communication, physical and learning challenges along with the "typical student".

**Registration fees:**     **\$150/person single registration**  
                                  **\$125/person for teams of 2-5**  
                                  **\$110/person for teams of 5 or more**

(Please note: Special pricing will not appear upon registration on myQuickreg. Please adjust your payment according to price scale)
