

RESPONSE TO INTERVENTION (RtI) FOR 4K & EARLY CHILDHOOD

TRAINING CONTENT:

These workshops will explore recommended practices for all young children within an RtI framework:

- Overview of RtI in Early Childhood Settings
- Evidence-based Practices
- Differentiated Instruction
- Intentional Teaching within a Tiered Model
- Critical Elements of the Learning Environment
- Balanced Assessment: Gathering and Using Child Data to Guide Teaching & Improve Learning
- Collaboration in the Context of Culturally Responsive Practices

The WI Department of Public Instruction believes that the concepts of RtI align with early education. In order for the framework to be most effective, the unique characteristics of young children and their circumstances must be considered.

AUDIENCE: 4k, ECSE and their community partners
