Tools to Support Reading and Writing for Students with Special Needs

CESA 6 SMART THINKING.

March 19, 2010

Are you frustrated by your students' inability to read and write in the traditional manner? Are you looking for free or low cost solutions? Join us for this "hands-on" workshop where we will investigate both web-based tools and software to assist students struggling with reading and writing.

The learner will:

- Understand the rationale for using the computer as a tool for literacy activities
- Be familiar with computer software that students can use to have information read to them
- Be familiar with computer software that students can use to write even if they are unable to read conventionally
- Explore software to make literacy activities meaningful to the student
