**Registration Deadline: May 17, 2013**

This course will introduce participants to the potential of portable videoconferencing equipment (Polycom). The content is appropriate for K-12 educators, distance learning facilitators, and any other staff members in the CADENC, CWETN, Project CIRCUIT, and WIN school districts who would like to make better use of their Polycom videoconference equipment.

Participants will:

- have hands-on practice with Polycom operation
- learn to use the Polycom for “formal” and “informal” instruction and meetings
- learn about video field trips for use in the classroom
- develop two lesson plans
- learn how to use the desktop Polycom client (CMA)

In addition, four video field trips will be scheduled, giving participants a first hand experience.

## CESA 10

725 W Park Ave

Chippewa Falls, WI 54729

Fax: 715-720-2070
