iPads 101

APRIL 16,
2013

Are you thinking about purchasing an iPad and want to learn more about it, or do you have one and want to put it to better use? Is your iPad just an expensive toy to play solitaire on? If so this workshop is for you.

Whether you are a *newbie* to iPads or a veteran user join us to learn how to make the iPad indispensable in your life. We will spend a great deal of time going through the many, many settings. What are they? What do they do? Should I change them...or not? Are you using the iPad in your classroom...with children? Is security an issue? What about organization, how can I find everything? These questions and many more will be answered. Then we will delve into the apps that came with your iPad. Are there enough to use in your classroom without ever purchasing another app? Come and find out.

**\$75 per participant per day for CESA 8 Curriculum
Instructions & Assessment member districts.
\$125 per day per participant for all other districts**

iPads 101 1/2

Now that you know the basics come back and learn more...

Join in this session to experience *really* using the iPad. The workshop will begin with “must see” apps and websites for educators. We will showcase apps that are designed specifically for Elem/MS/HS grade levels. We will *peer up* and share apps that we have used or new apps that we have found. The day will include plenty of hands-on time. (This workshop is intended for participants who have a good working knowledge of iPad basics.)
