

# iPad Basics 101

June 25, 2013

8:00-11:30

# CESA 5

\$75

There are thousands of iPod/iPad apps to use with students, but before you start using apps with students, you need to know how to set up, manage and use your device. This ‘basics’ workshop will show you how to set up and use your iPod/iPad including the multitude of Settings features in iOS 6 that are very beneficial and specialized settings such as Guided Access to “lock” students into an app, Speak Selection so that students can hear text read back to them, multi-finger touch and many more. This overview will include General and Accessibility settings, iTunes management of apps, podcasts, iTunes U and the “foundational” Apple Apps that are pre-loaded onto your device. Participants should bring an iPod/iPad. If you want to download any apps, you must have an iTunes account set up including a username and password.

Presented by Judi Cumley, CESA 5 Assistive Technology Consultant and Apple Certified Trainer
