

# Project TILT

Technology Integration Leadership Teams

— a CESA 5 EETT grant consortium —

## Project TILT Workshop for Library Media Specialists

Thursday, March 4, 2010  
8:45 a.m. - 3:00 p.m.

CESA 5 Office, Portage

Today's students are growing up in a digital age. They expect to obtain the latest information instantly and flourish in an interactive, multimedia, multitasking environment.

Essential Questions for Library Media Specialists:

- What roles do library media centers play in creating 21st Century classrooms?
- How do library media specialists support instructional technology use?
- How can library media specialists support and encourage adoption of the "*Using Technology with Classroom Instruction that Works*" framework?

Join colleagues in an exploration of 21st Century Digital Classrooms and the vital skills that our students will need to acquire for successful learning and for the world of work. Brainstorm strategies to support your district's Project TILT teams. Try out blogs, wikis, and other Web 2.0 tools which fit into the research-based "*Using Technology with Classroom Instruction that Works*" framework. Discuss professional development strategies and additional library media center resources which could also support implementation in your school or district.

There will be time for hands-on activities from "*Using Technology with Classroom Instruction that Works*", so please bring a portable computer with wireless Internet card.

Facilitators: Susan Fulks, Director, Instructional Technology Services, CESA 5  
Jennifer Casper, Curriculum & Technology Support Specialist, CESA 5
