

Technology Integration Leadership Teams
— a CESA 5 EETT grant consortium —

Project TILT Workshop for Administrators

Tuesday, April 13, 2010

8:45 a.m. - 3:00 p.m.

Hotel Mead, Wisconsin Rapids

Today's students are growing up in a digital age. They expect to obtain the latest information instantly and flourish in an interactive, multimedia, multitasking environment.

Essential Questions for Administrators:

- What roles do instructional leaders play in creating 21st Century classrooms?
- How do instructional leaders support and evaluate instructional technology use?
- How and why might a traditional face-to-face class be morphed into an online classroom environment?

Join colleagues (principals, curriculum directors, superintendents) in an exploration of 21st Century Digital Classrooms and vital skills that our students will need to acquire for successful learning and for the world of work. Brainstorm strategies to overcome implementation obstacles. Try out blogs, wikis, and other Web 2.0 tools which fit into the research-based "*Using Technology with Classroom Instruction that Works*" framework. Discuss rubrics which can be used to support and evaluate appropriate uses of technologies in various classroom settings.

There will be time for hands-on activities from "*Using Technology with Classroom Instruction that Works*", so please bring a portable computer with wireless Internet card.

Facilitators: Lois Alt, Assistant Superintendent for Curriculum/Instruction/Technology, D.C. Everest
Susan Fulks, Director, Instructional Technology Services, CESA 5

Register online at MyQuickReg.com

No charge for administrators from Project TILT Consortium Districts.
