

A Closer Look at NGSS

Join us

Wednesday, January 29, 2014 with K-5 teachers or
Thursday, January 30, 2014 with 6-12 teachers

- Do we provide a standards based science education and if not, what's missing?
- Do I know how to read the standards yet?
- Understand the shifts and decide how much change will be required in your school?
- How will these shifts impact teaching and learning in your school?
- Examining performance expectations and discussing the connections with SLO's.

as we take a closer look at
the
*Next Generation Science
Standards!*

Twenty six states have either formally adopted these standards as their new state standards or are in the middle of a process towards adoptions. As Wisconsin awaits it's formal adoption we are working to learn as much as we can about the content expectations, shifts from the WMAS, performance expectations, and what this means for change in our school and/or district.
