

# Behavior Change is a Process; Not an Event

## Structuring Classrooms that Work

October 18, 2013  
9:00-3:30

CESA #2 Conference Center  
1221 Innovation Drive, Room 111  
Whitewater, Wi 53190

The public school has changed dramatically over the past several decades. The academic demands and expectations for student achievement have increased significantly. At the same time, the population of students entering the classroom displays greater risk for academic failure and/or to engage in challenging behavior. A growing number of educators feel ill-prepared to address the emotional, behavioral and mental health disorders common in children and youth as well as effective strategies to promote behavior change in the public school. Specific information will be provided to help structure the classroom to intervene with students who engage in high rate and/or serious problem behavior.

**Presenter:** Dr. Richard Van Acker is a professor of Special Education at the University of Illinois in Chicago. He has been involved with teacher education for those teachers interested in working with students who display challenging behavior, mental health and emotional disorders. Rick consults with schools and school districts across the nation in efforts to assist in the provision of quality educational programming for students with challenging behavior. He is one of the co-editors of a recent book entitled "Cognitive Behavioral Interventions for Emotional and Behavioral Disorders."

**Audience:** Principals, Directors of Special Education, Directors of Curriculum and Instruction, Regular Ed and Special Ed Teachers, Psychologists

**Cost:** \$100 per person
