

ECSE Outcomes Group

Early Childhood Special Education Outcomes Group 2013-2014

...For **all** professionals working with young children with disabilities in school-based and/or community-based settings in any variety of ways including direct service, itinerant teaching, consultation model or coaching...

This is an extension of last year's Early Childhood Consultation Network now renamed the **ECSE Outcomes Group (Early Childhood Special Education Outcomes Group)**. The emphasis is on teams of professionals (general education and special education teachers, school psychologists, SLPs, OTs, PTs, ADPE, etc.) coming together to build off of Robin McWilliam's work surrounding the Routines-Based Interview/Intervention by engaging every child in the preschool classroom/community care environment and working with families of young children with special needs.

Objectives:

- Increasing and improving environments to serve young children with disabilities
- Improving outcomes of preschool children ages 3-6 who demonstrate improved positive social emotional skills (including social relationships)
- Refining skills working with families of young children with special needs
- Assessing families' and children's need with the Routines-Based Interview (RBI)
- Planning strategies for improving engagement of children with disabilities into classrooms by using the Zone
- Defense Schedule and creating a classroom environment that supports engagement
