Googlizing Personalized Learning... For All Learners

Personalized Learning is one of the latest innovations in educational pedagogy. It's now more important than ever to engage students to take ownership of their own learning. Think about it: What do you do when you want to learn something? Typically, "Google it". Inspire students to inquire. Motivate them to learn by giving them the digital tools to own their learning. Customizing Google tools can do just that whether if be creating websites and blogs with Google Sites and Blogger, customizing Chrome browsers with Apps and Extensions to differentiate learning or collaborating on global projects. *Give the students the world...and watch them redefine it.*

Prerequisite: Basic computer skills

(1) Graduate Credit through Viterbo University will be available for this workshop upon receipt of additional registration and tuition payment of $200.00 the day of the workshop

REGISTRATION:

Tuesday, 1/21/2014
9:00am—3:00pm (Registration 8:30am)
