

Exploring WISEdash and MDAT

Focusing on Students with Disabilities

Friday, January 31, 2014 • 8:30 a.m. - 3:30 p.m.

Presenter: Erik Larsen, CESA 6 Coordinator of School Accountability

Description:

This hands-on training will enhance your skills with "WISE" data tools as they inform your schools' improvement plan. The goal of Wisconsin Information System for Education Data Dashboard (WISEdash) is to increase access to education data to enable educators to create more data informed decisions. WISEdash uses "dashboards," or visual collections of graphs and tables, to provide multi-year education data. It provides access to an unprecedented number of reports on a variety of topics which offer new opportunities to enhance data inquiry for educators. The Multi-Dimensional Analytic Tool (MDAT) application allows users to create reports comparing student achievement over time utilizing WKCE and other data sources. MDAT has the capability to analyze student-level information as well as to compare to district and state averages.

Workshop Objectives:

- Explore and analyze achievement, growth, attendance, gaps, graduation and other state-available data to the student detail level
- Determine data questions, document data findings, and formulate data inferences
- Inform the school improvement process, with connections to annual goals, AMOs, SLO focus areas and strategic action plans
- Utilize charts and graphs to analyze school and student progress over time

Requirements:

WAMS ID and Password
WISEdash and MDAT district access

Who should attend?

Directors of Special Education and Pupil Services, Program Support Teachers and other District Leadership Staff
